claims and to be republished in the event of receipt of
amendments(88) Date of publication of the international search report:
12 August 2004For two-letter codes and other abbreviations, refer to the "Guid-
ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.(54) Title: CHROMIUM DIOXIDE (CrO₂) AND COMPOSITES OF CHROMIUM DIOXIDE AND OTHER OXIDES OF
CHROMIUM SUCH AS CrO₂/Cr₂O₃ AND CrO₂/Cr₂O₃ AND PROCESS FOR MANUFACTURING THE SAME(57) Abstract: A novel process for preparing chromium dioxide of substantially high purity as well as composites of CrO₂/Cr₂O₃ and
CrO₂/Cr₂O₃ following a sequence of simple steps. The process does not require pressure as a control parameter during the process of
synthesis. No chemical modifier has been used to bring down the working pressure during synthesis. Fairly hard sintered pellets of
CrO₂ can be obtained without introducing any detectable impurity phase that usually appears during the process of sintering. Further,
CrO₂/Cr₂O₃ and CrO₂/Cr₂O₃ composites have also been prepared where the fraction of insulating Cr₂O₃ or Cr₂O₃ in metallic CrO₂
can be easily controlled. Significant negative magnetoresistance is found in pure CrO₂ (5 % MR) as well as CrO₂/Cr₂O₃ (33 % MR)
composites near room temperature. The MR studies on the CrO₂/Cr₂O₃ composites have been done and significant negative MR (22
) has been found in CrO₂/Cr₂O₃ composites near room temperature.

INTERNATIONAL SEARCH REPORT

national Application No
PCT/IN 03/00278

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 C01G37/02 C01G37/02 611B5/706 H01F1/40

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 C01G 611B H01F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)
EPO-Internal, WPI Data, PAJ, CHEM ABS Data, INSPEC

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category * Citation of document, with indication, where appropriate, of the relevant passages

Relevant to claim No.

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the International filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (see specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the International filing date but later than the priority date claimed

T later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/IN 03/00278

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(e).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

As a result of the prior review under R. 40.2(e) PCT,
part of the additional fees are to be refunded.

1. ☒ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☒ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-8

Chromium dioxide having saturation magnetisation of at least 110 emu/g

2. Claims: 9-15,21-24

Composite of chromium dioxide and chromium sesquioxide having negative magnetoresistance of at least 0.5% near room temperature at 2 Tesla

3. Claims: 16-24

Composite of chromium dioxide and Cr2O5 having negative magnetoresistance of at least 0.5% near room temperature at 2 Tesla

4. Claims: 25-35,37

Preparation process for chromium dioxide by heating an intermediate oxide at a given temperature for 1 to 5 hours and the product obtained therefrom

5. Claims: 25-36,38

Preparation process for a composite of chromium dioxide and chromium sesquioxide by heating an intermediate oxide at a given temperature for 1 to 5 hours and the product obtained therefrom

6. Claims: 25-36,39

Preparation process for a composite of chromium dioxide and Cr2O5 by heating an intermediate oxide at a given temperature for 1 to 5 hours and the product obtained therefrom
